WEBINAR Schedule

This webinar highlights an innovative program from Agile Mind**:** the **Middle and High School Mathematics Initiative,** which promotes high achievement in mathematics. Among other aspects, it will provide an overview of how this highly research-based solution effectively addresses the challenging, yet vital transition from middle to high school mathematics.

Authored by the **Charles A. Dana Center at The University of Texas at Austin**, the Agile Mind programs offer a system of online tools for supporting classroom instructional practices, meeting the professional development needs of teachers, and offering structured, interactive supports for students. Key components include:

- Mathematics course content and presentation tools
- High-quality formative assessments
- Embedded professional development
- Robust real-time reporting

The **Mathematics Initiative** focuses on several strategic outcomes:

- Raising student achievement in mathematics by providing interactive, standards-based mathematics instructional content and assessments
- Increasing student engagement through the use of animations and real-life connections
- Strengthening teacher effectiveness by supporting
  - Conceptual approaches to teaching mathematics,
  - The integration of multiple representations into daily practice, and
  - A functions-based foundation across grades to promote success in the teaching and learning of algebra.
